10.	Member	M. MURALI	Lecturer / BEC (Chemistry)	muraliimsian@gmail.com	8015750383

## OBJECTIVES:

Internship are educational and career development opportunities, providing practical experience in a field or discipline. They are structured, short –term, supervised placements often focused around particular tasks or projects with defined timescales. An internship may be compensated or some time may be paid. The internship has to be meaningful and mutually beneficial to the intern and the organization. It is important that the objectives and the activities of the internship program are clearly defined and understood. Following are the intended objectives of internship training.

- Will expose technical students to the industrial environment, which cannot be simulated in the classroom and hence creating competent professionals for the industry.
- Provide, possible, opportunities to learn, understand and sharpen the real time technical/managerial skills required at the job.
- Exposure to the current technological developments relevant to the subject area of training.
- Experience gained from the 'Industrial internship' in classroom will be used in classroom discussions.
- Create conditions conducive to quest for knowledge and its applicability o the job.
